SAFE ROADS FOR ALL

Strategic Highway Safety Plan

Data driven plan that articulates strategies that NMDOT will undertake in the next 5 years to reduce fatal and serious injury crashes in New Mexico. Includes road Safety Audits and public input during the Safety Summit

NMDOT

Highway Safety Improvement Program

The Highway Safety Improvement Program provides federal funding for projects that address identified safety issues with the goal of reducing serious injuries and fatalities of the traveling public.

Rail-Highway Crossing Program

Developed to identify and reduce hazards to motorists, bicyclists, and pedestrians at existing highway-rail grade crossings.

NMDOT

NM Bike Plan

A long-range infrastructure plan that identifies which NMDOT owned/maintained roadways are desirable for bicycle infrastructure investment.

Pedestrian Safety Action Plan

A 5-year framework of 40+ actions in 7 different categories with the goal to reduce pedestrian serious injury and fatal crashes.

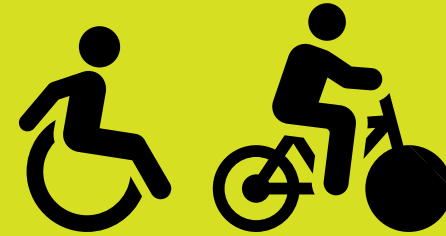

Community Transportation Safety Plans

Providing on-call consultation to communities to complete transportation safety plans.

NMDOT

Complete Streets Strategic Plan

A roadmap for how to institutionalize complete streets in New Mexico for roadways built for all modes, and people of all ages and abilities, in a context sensitive manner that considers the roadway location and elements.

State Rail Plan

Describes the current status of the New Mexico rail system, demonstrates the demand for and the benefits of the rail system, and identifies capital infrastructure and operating needs that maintain existing infrastructure and services while also enhancing capacity and improving safety.
